

## **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions and listings of claims in the above-identified application:

### **Listing of Claims**

**Claims 1-18** (Cancelled)

**Claim 19** (New) A display apparatus comprising:

a display unit adapted to display an image; and

a detecting unit adapted to detect whether a predetermined time is passed,

wherein said display unit displays said image as being three dimensional before said predetermined time is passed and displays said image as not being three dimensional after said predetermined time is passed.

**Claim 20** (New) A display apparatus according to claim 19, wherein said display apparatus is capable of being mounted on user's head.

**Claim 21** (New) A display apparatus according to claim 19, wherein said display apparatus further comprises a time setting unit adapted to set said predetermined time by manual operation.

**Claim 22** (New) A display apparatus according to claim 19, wherein said display apparatus is capable of being mounted on user's head, and wherein said display apparatus further comprises a time setting unit adapted to set said predetermined time by manual operation.

**Claim 23** (New) A display apparatus according to claim 19, wherein said display unit includes a liquid crystal display adapted to display an image, and a backlight source adapted to illuminate said liquid crystal display from behind.

**Claim 24 (New)** A method for a display apparatus that includes a display unit adapted to display an image, and a detecting unit adapted to detect whether a predetermined time is passed, said method comprising steps of:

displaying said image as being three dimensional before said predetermined time is passed; and

displaying said image as not being three dimensional after said predetermined time is passed.

**Claim 25 (New)** A method according to claim 24, wherein said display apparatus is capable of being mounted on user's head.

**Claim 26 (New)** A method according to claim 24, wherein said display apparatus further comprises a time setting unit adapted to set said predetermined time by manual operation.

**Claim 27 (New)** A method according to claim 24, wherein said display apparatus is capable of being mounted on user's head, and wherein said display apparatus further comprises a time setting unit adapted to set said predetermined time by manual operation.

**Claim 28 (New)** A method according to claim 24, wherein said display unit includes a liquid crystal display adapted to display an image, and a backlight source adapted to illuminate said liquid crystal display from behind.
